

uprox®+ For the food industry

The uprox®+ sensors for the food industry feature a rugged V4A stainless steel housing with laser-engraved type label and resist temperatures of -40 °C to +100 °C easily. A special double lip seal prevents the ingress of liquids. The materials used are resistant to detergents and disinfectants. The fluid-tight housing and the excellent EMC properties of the electronics ensure failsafe operation in harsh industrial production environments.
